RE: Location Map, Lynn Springs L.M.O. Plan Modification/Amendment

Dear Heidie,

Enclosed please find two (2) copies of the enhanced Location Map that you have requested pertaining to our L.M.O. Plan Mod/Amendment for the Lynn Springs Quarry.

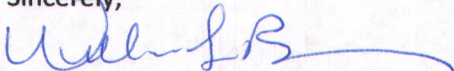

We have reviewed the map and find all of the icons and illustrations to be accurate and decipherable as to the requirements as outlined. The Vegetation Stockpile, Soil/Minor Vegetation (Water Barrier), and Waste rock dispositions are clearly discernable and accurate as to required scale.

Please note that for some reason our GPS demonstrated the line separating section 20 and 29 to be some south of the USGS line. For purposes of this Plan Mod./Amend. Our north line should be treated as the boundary between the two sections. Also, this map, at this time is not constructed to address the future plans for the South Quarry Area, thus no acreage sum is listed for this part of the map. Accurate acreages will be determined and submitted at the time we propose amending this same plan to include development of the South Quarry Area as concurrent and final reclamation of the North Quarry is completed.

The disturbance acreage total for the North Quarry Area will be reduced to well below the listed 7.338 ac. as reclamation treatments continue to be carried out in the area directly north of the "Minable Stone" location. The BLM portion has been back-filled and contoured with the exception of one small pit area which will be filled and contoured at the start of ops. this spring, thus BLM portion is deleted here.

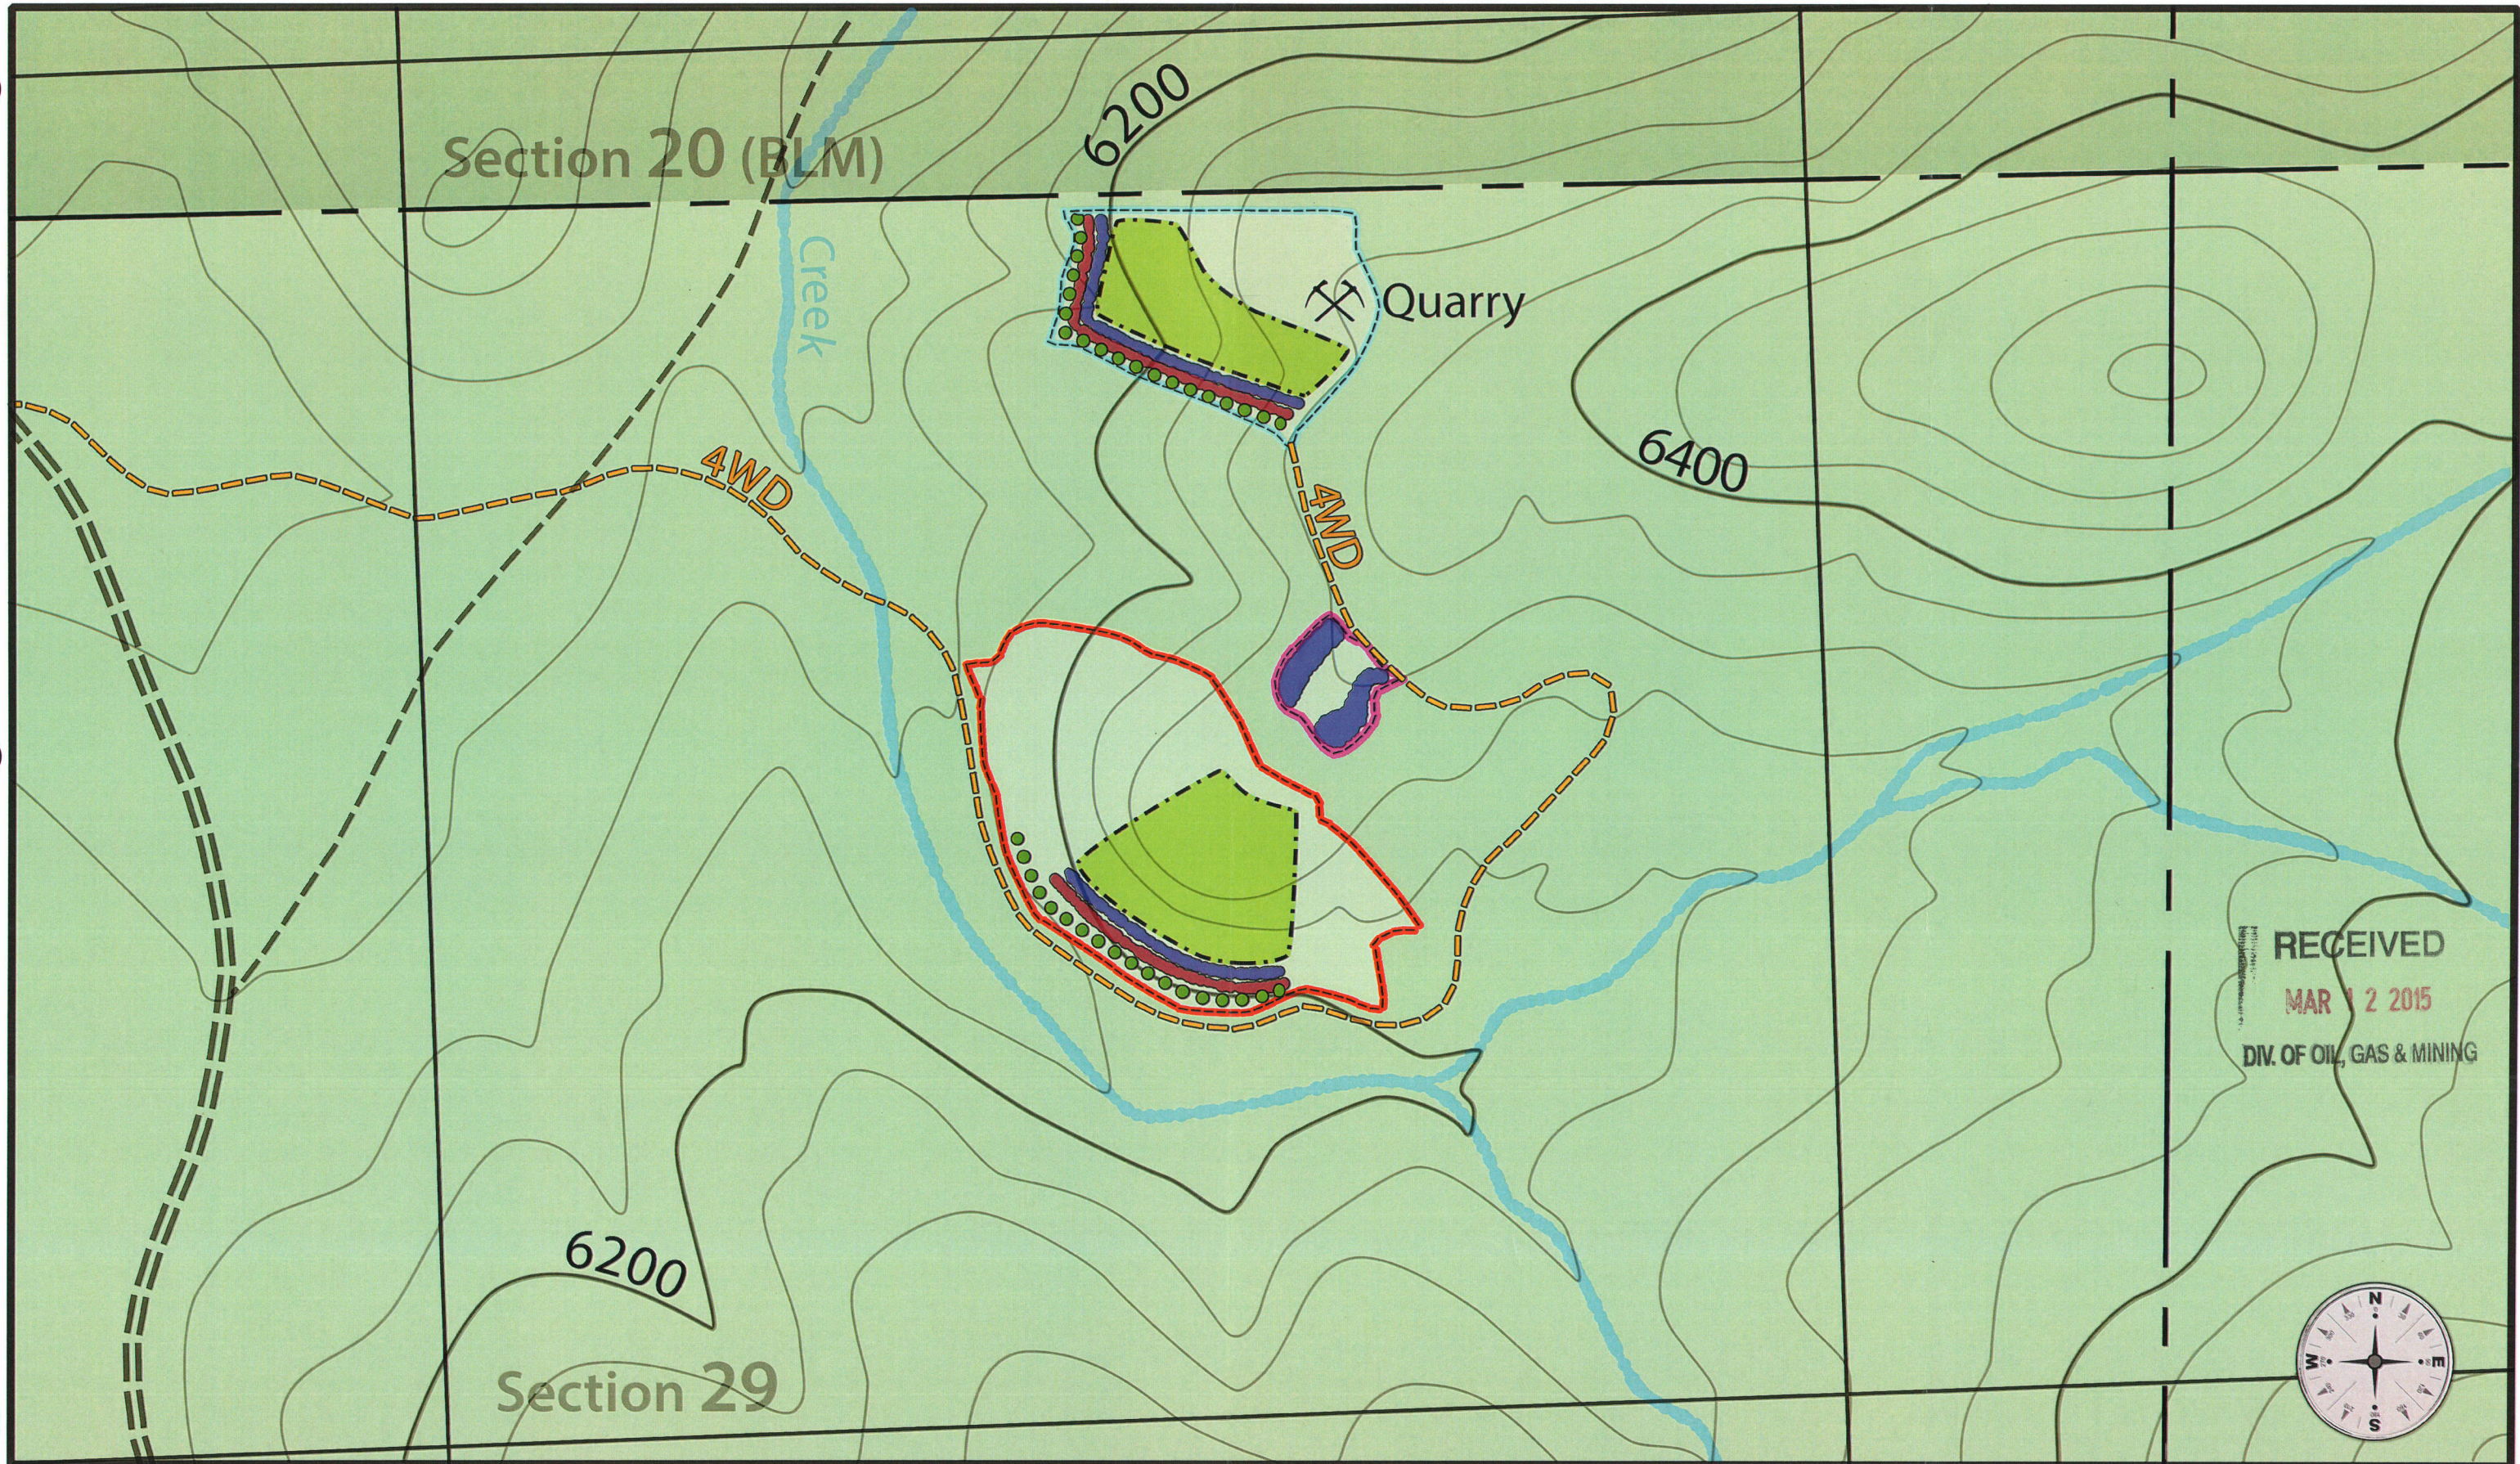

Thank you for your help and consideration in this process.

Sincerely,

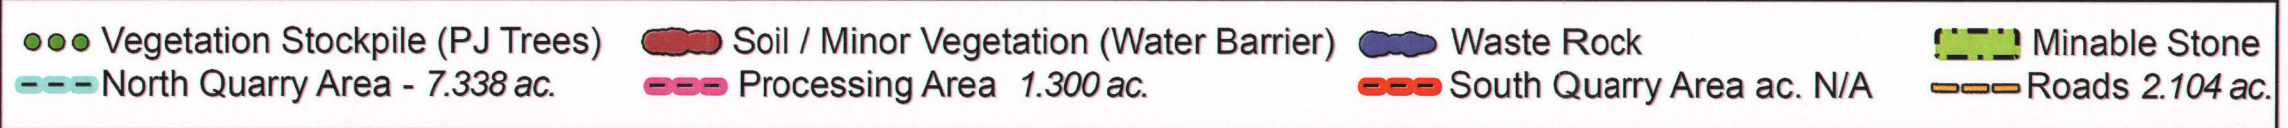

William (Bill) Bown
